

BOROUGH OF MILFORD
ORDINANCE NUMBER 963-2023

**ORDINANCE REGULATING PRIVATE STORM DRAIN
RETROFITTING IN THE BOROUGH OF MILFORD IN
ACCORDANCE WITH MANDATES FROM NEW JERSEY'S
DEPARTMENT OF ENVIRONMENTAL PROTECTION.**

CHAPTER XX
PRIVATE STORM DRAIN RETROFITTING.

SECTION I.
Purpose.

An ordinance requiring the retrofitting of existing storm drain inlets which are in direct contact with repaving, repairing, reconstruction, or resurfacing or alterations of facilities on private property, to prevent the discharge of solids and floatables (such as plastic bottles, cans, food wrappers and other litter) to the municipal separate storm sewer system(s) operated by the Borough of Milford to protect public health, safety and welfare, and to prescribe penalties for the failure to comply.

SECTION II.
Definitions.

For this Ordinance, the following terms, phrases, words, and their derivations shall have the meanings stated herein unless their use in the text of this Chapter clearly demonstrates a different meaning. When not inconsistent with the context, words used in the present tense include the future, words used in the plural number include the singular number, and words used in the singular number include the plural number. The word “shall” is always mandatory and not merely discretionary.

- A. Municipal separate storm sewer system (MS4) – a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, manmade channels, or storm drains) that is owned or operated by the Borough of Milford or other public body, and is designed and used for collecting and conveying stormwater.
- B. Person – any individual, corporation, company, partnership, firm, association, or political subdivision of this State subject to municipal jurisdiction.
- C. Storm drain inlet- an opening in a storm drain used to collect stormwater runoff and includes, but is not limited to, a grate inlet, curb-opening inlet, slotted inlet, and combination inlet.
- D. Waters of the State – means the ocean and its estuaries, all springs, streams, and bodies of surface or ground water, whether natural or artificial, within the boundaries of the State of New Jersey or subject to its jurisdiction.

SECTION III.
Prohibited Conduct.

No person in control of private property (except a residential lot with one single family house) shall authorize the repaving, repairing (excluding the repair of individual potholes), resurfacing (including top coating or chip sealing with asphalt emulsion or a thin base of hot bitumen), reconstructing or altering any surface that is in direct contact with an existing storm drain inlet on that property unless the storm drain inlet either:

1. Already meets the design standard below to control passage of solid and floatable materials; or
2. Is retrofitted or replaced to meet the standard in Section IV below prior to the completion of the project.

**SECTION IV.
Design Standards.**

Storm drain inlets identified in Section III above shall comply with the following standard to control passage of solid and floatable materials through storm drain inlets. For purposes of this Paragraph, “solid and floatable materials” means sediment, debris, trash, and other floating, suspended, or settleable solids. For exemptions to this standard see Section V.3 below.

1. Design engineers shall use either of the following grates whenever they use a grate in pavement or another ground surface to collect stormwater from that surface into a storm drain or surface water body under that grate:

a. The New Jersey Department of Transportation (NJDOT) bicycle safe grate, which is described in Chapter 2.4 of the NJDOT Bicycle Compatible Roadways and Bikeways Planning and Design Guidelines (April 1996); or

b. A different grate, if each individual clear space in that grate has an area of no more than seven (7.0) square inches or is no greater than 0.5 inches across the smallest dimension. Examples of grates subject to this standard include grates in grate inlets, the grate portion (non-curb-opening portion) of combination inlets, grates on storm sewer manholes, ditch grates, trench grates, and grates of spacer bars in slotted drains. Examples of ground surfaces include surfaces of roads (including bridges), driveways, parking areas, bikeways, plazas, sidewalks, lawns, fields, open channels, and stormwater basin floors.

2. Whenever design engineers use a curb-opening inlet, the clear space in that curb opening (or each individual clear space, if the curb opening has two or more clear spaces) shall have an area of no more than seven (7.0) square inches or be no greater than two (2.0) inches across the smallest dimension.

3. This standard does not apply:

a. Where the municipal engineer agrees that this standard would cause inadequate hydraulic performance that could not practicably be overcome by using additional or larger storm drain inlets that meet these standards; or

b. Where flows are conveyed through any device (e.g., end of pipe netting facility, manufactured treatment device, or a catch basin hood) that is designed, at a minimum, to prevent delivery of all solid and floatable materials that could not pass through one of the following:

i. A rectangular space four and five-eighths inches long and one and one-half inches wide (this option does not apply for outfall netting facilities); or

ii. A bar screen having a bar spacing of 0.5 inches.

c. Where flows are conveyed through a trash rack that has parallel bars with one-inch (1”) spacing between the bars; or

d. Where the New Jersey Department of Environmental Protections determines, pursuant to the New Jersey Register of Historic Places Rules at N.J.A.C. 7:4-7.2(c), that action to meet this standard is an undertaking that constitutes an encroachment or will damage or destroy the New Jersey Register listed historic property.

**SECTION V.
Violations, Penalties, and Enforcement.**

Any person(s) who is found to be in violation of the provisions of this ordinance shall be subject to a fine not to exceed Five Hundred Dollars (\$500.00). This Chapter shall be enforced by the Borough’s Zoning Officer, the Borough’s Sewer Administrator, or other Borough personnel as may be assigned by resolution of the Milford Borough Common Council

SECTION VI.

Repealer.

All ordinances or parts of ordinances in conflict or inconsistent with any part of this Ordinance are hereby repealed to the extent that they are in conflict or inconsistent.

**SECTION VII.
Severability.**

If any section, provision, or part of provision of this Ordinance shall be held to be unenforceable or invalid by any court, such holding shall not affect the validity of this Ordinance, or any part thereof, other than the part so held unenforceable or invalid.

**SECTION VIII.
Effective Date.**

This Ordinance shall take effect after passage and publication in the manner provided by law.

PLEASE TAKE NOTICE that the foregoing Ordinance was introduced and passed on first reading on the 7th day of August, 2023, at a meeting of the Borough Council of the Borough of Milford and will be taken up for final consideration and passage at a regularly scheduled meeting of the Mayor and Borough Council of the Borough of Milford to be held on the 2nd day of October, 2023, at 7:00PM, or as soon thereafter as the matter may be reached, to be held at the Milford Borough Fire Company, located at 21 Water Street, Milford, New Jersey 08848.

Copies of said Ordinance are at the office of the Milford Borough Municipal Clerk, 30 Water Street, Milford, New Jersey 08848, and posted on the Borough website.

HENRI SCHEPENS, MAYOR

ATTEST:

KAREN DYSART, RMC
MUNICIPAL CLERK

Introduction: August 7, 2023
Public Hearing: October 2, 2023
Adoption: October 2, 2023
Publication: October 12, 2023
