§ 34-42 Purpose/Charge/Mission

The purpose of the SCC is to provide a function for the construction phase of the Project similar to that formerly performed by the School Building Committee with regard to the pre-construction phase of the Project. 2. Establishing regular communication channels with the community, school family populations, and neighbors regarding the project progress through periodic notices and public meetings. Actively soliciting the comments and input of neighbors and interested parties by dedicating any required meetings on an as-needed basis, beyond the regular meetings, to hear the concerns of neighbors, parents, students, and other interested parties.
3. Assisting the Owner's Project Manager (OPM) with applications to the Rhode Island Department of Education (RIDE).
4. Working with the OPM to assist in the creation of construction bid package and in the determining of a list of eligible bidders.

The SCC, in coordination with the Town Solicitor, shall negotiate any contract to be entered into by the Town and said firm(s) subject to approval of the Town Council, provided, however, that such contracts shall account for established School Committee policies regarding school access, educational concerns, and other such matters.
6. Reviewing design documents to evaluate, refine, and update cost estimates and verify that the plans fulfill the purpose of the Project in a reasonable manner.
7. Evaluating all construction bids received and pursue any required bid clarifications.
8. Meeting with the OPM, Architect, General Contractor, or Construction Manager, as needed.
9. Recommending approval to the Town Council of the final plans, specifications, bid documents, and contract documents for the Project, or, if delegated to the SCC by the Town Council, approving such final plans, specifications, bid documents and contract documents, with the exception of the Stage 2 Memorandum of Agreement with RIDE, which shall be approved and executed exclusively by the Superintendent and School Committee. All contract documents shall account for established School Committee policies regarding school access, educational concerns, and other such matters.

11. Providing recommendations to the Town Council seeking authorization for the start of construction of the Project.
12. Verifying that all required permits are in place and verifying compliance with all local, state, and federal laws.
13. Monitoring the construction process of the Project, including meetings with the OPM, Architect, project manager, construction contractor, sub-contractors and/or any other necessary parties.
14. Coordinating communication between the Construction Committee, the Town Council, School Committee and RIDE to keep all parties up-to-date on project developments.
15. Considering and acting promptly on all change orders, making certain that any increase in the overall cost involved in any such required change order is within the amount appropriated and available for the Project.
16. Monitoring the preparation by the Architect of a list of items (punch list) which are not fully completed or which require further attention when the architect has certified that the Project is substantially complete. The SCC shall make certain that such items are completed properly.
17. Reviewing the certification of compliance by the Architect that construction has been completed in compliance with contract documents and reviewing the list of items that are not yet satisfactorily completed.
18. Reviewing, approving and referring to the Town for payment, invoices with respect to the implementation of the Project.
19. Determining whether funds should be withheld from any payment request pending completion of any unfinished work or for any other appropriate reason, and approving the release of such funds when appropriate.

§ 34-43 Authority

The SCC shall have advisory authority to the Town Council to assist the Council in fulfilling its role to oversee construction of the Project, including, without limitation, fulfilling the functions outlined in § 34-42 above and taking all steps necessary or appropriate to fulfill such functions. Additionally, the SCC shall exercise such other powers and authority with regard to the Project as the Town Council shall delegate to it through vote of the Town Council.

Additionally, the SCC shall report to the Town Council and School Committee on a monthly basis if possible, although at a minimum within a quarterly reporting structure, depending on project

activity on all pertinent issues including the status of the project and schedule along with any recommendations. Upon completion of the project, the SCC shall make a complete and final report to the Town Council and School Committee, including other public bodies as required. The report shall include information concerning final costs for the project, the status of RIDE reimbursement applications, a list of unfinished projects not included in the final plan with an estimated cost and timeline, and any recommendations the SCC may have concerning on-going operation and maintenance of the buildings. The report may also include any recommendations from the SCC concerning project-based best practices learned during the project that may be applicable to future Town construction projects.
