Recently work has been done regarding the existing creek storm water mitigation and erosion control on the property.

As part of previous drawings and documents prepared by Gateway Design Studio and BFA, Inc. the REVISED concept plans are to depict a new accessible trail system through the woodland area to the bridge, future council ring, accessible ramp, and a walkway connecting to the gazebo to the west. The revised plans are to include concept design recommendations provided by GDS for the trail system layout, site furniture such as park benches and trash receptacles, signage and native landscape/vegetative remediation of the woodland and creek and raingarden basin area.

The goal is to create a REVISED needs assessment report and conceptual master plan which will serve as a guideline for improvements to this area of the park as well as a supportive document for applying for a Municipal Park Grant application which is due August 31, 2018. All the above mentioned improvements are contingent upon public input from the residents and future grant funding.

Final documents will be a combination of a written report and drawings for the use by GDS, BFA, Inc. and the City of Twin Oaks. All existing information regarding the park property will be furnished upon request to GDS by BFA, Inc. for the purposes of this
